#### Homs General Electricity Corporation Homs - Syria 2021 - 2023

I worked at the Homs General Electricity Corporation for two years and created two websites using PHP and SQL server the first for the company's workforce, which deletes, adds, edits, searches, and prints reports. It also allows indexing of tables, the other is for the industrial security store. It manages the contents of the store, knows the existing materials and their quantity, and prints bonds. Input and output. Tables can also be indexed and the database can be modified to suit company developments.
